

C&A's marketing, sales, design, software development, manufacturing, integration, installation, commissioning & servicing of electrical, control and automation systems and products are **ISO 9001: 2008 certified**, for superior **quality standards**.

Automation Campus - "Unnati" and its processes are governed by **Environmental Management System (EMS) ISO : 14001- 2004**.

This International Standard is applicable to Control & Automation that enterprises to

- a) Establish, implement change, maintain and improve an environmental management system.
- b) Assure itself of conformity with its stated environmental policy.
- c) Demonstrate conformity with this International Standard.

It applies to those environmental aspects that the organization identifies as those which it can control and influence.

The facility and its processes are also in line with **Occupational Health and Safety Assessment Series (OHSAS), ISO 18001:2007**.

The OHSAS standard enables an organization to control its OH&S risks and improve its OH&S performance.

Automation Campus is secured by **Information Security Management System (ISMS) ISO/IEC 27001:2005** covering "Processes for End to End Control and Automation Systems, Products and Solutions".

This standard addresses the confidentiality, integrity and availability of information. It demonstrates to customers, trading partners and stakeholders that Control & Automation is a secure organization to do business with and is in compliance with relevant laws and regulations.
