Mr. A. M. Naik releases L&T's First Corporate Sustainability Report

L&T's first Corporate Sustainability Report for 2007-08 was released by Mr. A. M. Naik, Chairman & Managing Director, in Mumbai today. It communicates L&T's sustainability performance to all its stakeholders and will help in benchmarking with international peers.

This is the first corporate sustainability report to be brought out by an engineering & construction company in India. It is a matter of pride for all L&T-ites that the report secured the highest rating of 'A+' given by the Global Reporting Initiative (GRI), Amsterdam.

Releasing the report, Mr. Naik remarked that like the smiling girl on its cover, we would like to see smiles on the faces of our shareholders. "For this we need to put extra efforts to improve performance, reduce costs, and create higher shareholder value," he said.

Sustainability reports disclose a company's performance on Economic, Environmental and Social parameters. Reporting can go a long way in satisfying stakeholders' demands for transparency on corporate responsibility.

The sustainability report can be viewed on 'eCampus'.
